Subject: Hurt Microsoft, hurt the country.

If you insist on a which hunt why are you not going after Steve Case From AOL?

AOL blocks photos coming from other E Mail sources. AOL stands in the way Of Instant messages to all ESPs, MSFT does not.

This is about money for other companies not the people of our Country, Apple price for price is a computer I as a Computer teacher feels like running for the door when I see one.

It has the worse mouse, lousy graphics is difficult to navigate.

I find it difficult to believe the people against MST have ever used a home computer.

The Government must have determined that the American People are stupid, that they buy Windows because Bill Gates secret organization of Storm Troopers sneaks into homes and forces prospective buyers to purchase Windows.

Forget the Hype that Apple Computers do not hang up. In 10 years of teaching computers, I have seen Jobs little mirical hang up three times to every once for Windows.

I hate to think this, but is the case against Gates fueled by his lack of bribing legislators, or is it just that legislators and judges are a lot less Intelligent then I ever thought they were. BRIAN

PS Who designed the Graphics for Apple!
